"I would challenge others to find a harsher environment than a TBM (Tunnel Boring Machine). We used cameras at multiple locations along the TBM to view progress and as indicators for material conveyance. These cameras were mounted beside conveyor belts which had hard rock tunneling waste transported at high speed past the camera. It was not uncommon for small and medium size rocks to hit these cameras on the lens and body. They stood up to this punishment 24/7 and the only thing replaced was the occasional protective glass on the camera enclosure. I would recommend these cameras for all harsh environment CCTV monitoring and surveillance. I believe they are virtually indestructible."

- Colin Savage, B.A.Sc, M.A.Sc, Seymour Capilano Twin Tunnels Project

(Video Encoder Optional)

CC02

Industrial Camera

- High Impact Housing
- High Resolution
- Waterproof/Dustproof
- Vibration Resistant Design
- Extreme Temperature Rating
-60° ~ 60° C (-76° ~ 140° F)
- Limited Lifetime Warranty

"My company is located in St. Petersburg Russia. We install video systems in large industrial factories in my country. We purchased 25 Opticom cameras for a Mining company in Siberia about 10 years ago. The cameras still are in use and have operated properly in harsh weather and high vibration."

- Vladimer Sceptik

VM-1

Vibration Camera Mount

- Exceptional Vibration Damping
- Heavy Duty Cast Metal Design
- Fits CC02 Industrial Camera

QS4-8

Dual Page Quad Splitter

- Split Screen for multiple camera viewing
- Up to 8 Cameras connected
- Zoom Function
- 2 Video Outputs

OWE Elite Series

4, 9, & 16 Channel DVRs

- Internet/Network Viewing
- Record/View up to 1,000 Cameras
- Frame-by-Frame Playback

LCDI-15, LCDI-17, LCDI-19 15", 17", 19" LCD Monitors

- High Resolution
- Industrial Grade
- Available in High Impact Plastic or Metal
- Sizes from 5.6" - 32" available

"It's a great little system. Installed it over half hour lunch break. The guys using it are amazed at the clarity! It goes in my thin file of great products! Thanks"
Tom Fulton - Britton Lumber, Fairlee, VT

FR-LCD-17, FR-LCD-20 Monitor Enclosure

- Dustproof
- Extends Life of Monitor
- Antiabrasion Polycarbonate Window

"When we were installing the video security and safety monitoring systems at the Universal Studios Theme Park we needed all of the performance features that Opticom's cameras provided. The rides required cameras that were waterproof, withstood constant vibration, captured clear sharp images and were small and compact so they could be installed in tight spaces. We chose the C602 cameras and are glad we did."
- Greg Edelman

MVM-LCD-101 Vibration Resistant Monitor Mount

- Extends Life of Monitor
- Exceptional Vibration Damping
- Heavy Die Cast Metal Design

Wireless Solutions

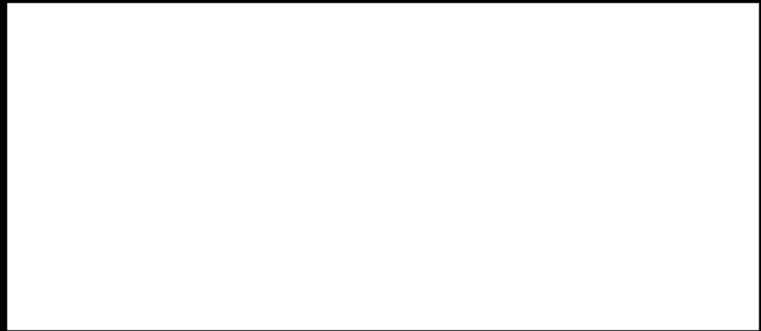

- Industrial Transmitters & Receivers
- Rugged All Weather Design
- Built-in Heater Option
- Long Range Solutions up to 50 miles
